

Extended Authorization for Limit Readers Level of Security

The screenshot displays the RDocs 'Manage' interface. A modal dialog titled 'New authorized readers' is open, showing a list of email addresses: `alice@northendassoc.com`, `sam@northendassoc.com`, `daniel@northendassoc.com`, and `megan@northendassoc.com`. Each email address is followed by a red 'x' icon. At the bottom of the modal are three buttons: 'Add reader' (green), 'Cancel' (red), and 'Save' (blue). The background interface shows the 'Manage' tab selected, with a user profile for `david@northendassoc.com` and a 'Logout' button. The main content area includes sections for 'Launches' (04/21/2023), 'Expires:', 'Allow responses to:', 'Share votes', 'Identify leakers', 'Track Interactivity' (with a plus icon), 'Address' (listing `kim@northendassoc.com`), 'Summary', and 'Activity Log'. A table at the bottom shows 'First Read (UTC)', 'Reads', and 'Total Minutes' with a value of 0.

RDocs™ takes productivity to the next level by allowing you to authorize additional readers to an existing Limit Readers Level of Security. This gives document owners the flexibility to expand their circle of trust without compromising on security. Whether you need to add a new team member to a project or share sensitive information with a new partner, you can now seamlessly authorize additional readers to access your RPD™ files.
