

Registered Email

Registered Email™ proof.
Registered Encryption™ privacy.

The Original Proof of Delivery Standard. The Only Court Accepted.

Providing Certified Peace-of-Mind in 190+ Countries, Since 2000.

Made in California. Served to the World.

AON

▶▶ Customer Stories

Aon is the world's largest insurance broker. Thousands of their users have relied on Registered Email™ timestamped proof of delivery plus privacy compliance. Even though they are all about Microsoft tools, they continue to add more thousands of users to our Registered products – that run inside Microsoft Office. Registered Email™ makes Microsoft better for business. Clearly Aon believes so.

Certified Email Proof of Delivery

Proof of Who Said What When, by Email

Our patented (R)egistered Email® service is the only email proof-of-delivery service that has been trusted for over two decades by businesses and governments of all sizes, internationally. Relied-on daily as proof of timestamped email and content delivery in 190+ countries. We're here for you, with the proof.

Email Encryption Privacy & Compliance

Audit-Ready Proof of Privacy Compliance

Our patent-pending Registered Encryption™ service is the first to provide you with the assurance — and forensic record — of fact of end-to-end privacy compliance on every message sent. It proves that you are meeting even the most stringent data privacy regulations, like GDPR and HIPAA. We're here for you, with compliance ease.

Email Evidence, Automated

Power of Proof™

We know every email matters. Whether sending a personalized message or volumes of notices, each Registered Email™ message returns a Registered Receipt™ email record; the global standard for court-accepted, timestamped proof of secure delivery of email message and attachment content. This record is durable (it may be forwarded, retaining its self-authenticating integrity), and is self-contained (it does not require any other record to be stored anywhere).

Email Open Tracking

True Email Tracking

Receive real-time alerts that you can trust; keep track of when your important messages were opened, by whom, what precise content is associated with them, and whether they were sent encrypted. In addition, considering today's newfound "bot" world, we ensure the opens are tracked to humans with our patented open tracking technologies. We're here to provide you with email confidence and insights, for every individually sent email or automated volumes.

Sender Authentication

Email Impostor Authenticator

Extend peace of mind beyond your company to your entire network, ensuring any recipient can verify — or prove if needed — the original author, content and timestamp of your email transmission. Our patented Digital Seal® technology empowers you to help your recipients distinguish your real email from impostor trickery; trickery that can cost you money and grief with misdirected payments.

Why We Are Unique

Our patented Registered Receipt™ is the only self-contained, self-authenticating, court-accepted email evidence record. Easy to send from within your existing email programs, or to automate with API.

Individual or Automated

Our Registered Email™ service installs onto the platforms your teams are already using — Microsoft Outlook, Gmail, Salesforce, or other CRMs. Or, you can easily automate with our dynamic API or email routing rules.

Simplicity

We understand that the true power of technology resides in user adoption. Senders can opt to send a Registered Email™ message at the click of a "Send Registered" button or rely on our AI to automatically convert certain messages into Registered Email™ message. Receivers never need anything on their end; we deliver right into the inbox.

Legal Proof®

The Registered Receipt™ email record is the global standard for court-accepted, timestamped proof of secure delivery of emails — and its attachments. Trusted and court tested by global businesses and government regulators across countries for two decades.

Identity, Authentication

Excellent technology is key, outstanding service is gold. Getting both in a single package is pure bliss. Our teams are more knowledgeable and friendlier to work with. That is our customers rate us with 99% satisfaction scores and 5-star accolades.

Thank you, to the more than **25 million people** the world over, who have put their trust in our team and technology, **since 2000**.
