2023 Vendor Assessment

Gartner®

"The Only Solution" for Proof of Delivery

"The **State of Ohio** investigated vendors that can provide "service" and "perfection" for sending email regarding administrative hearings. The mailing requirements are a part of Ohio Revised Code (ORC) Chapter 119 and are for the purpose of ensuring proper notice to the party ("service") and proof of that service back to the agency ("perfection).

RPost Registered Email™ does appear to be the only solution based on analysis and conversations with Gartner."

"Leader" for DTM

> In an era of escalating cyber threats and phishing schemes targeting transactions, digital transaction management companies prioritizing security are poised to become indispensable. RPost is pushing the envelope to introduce innovative features to meet evolving customer needs.

-- Jim Lundy, CEO, Aragon Research

"Innovator" for ECP

One of the significant RPost innovations is how RPost takes these content insights, maps them to a risk model, detects anomalous activity indicative of cybercriminal, human error, or internal leak threats, and automatically locks the exposed content to pre-empt sensitive information being leaked or a leak being a reportable breach.

RPost calls this its AI Auto-Lock™ intelligent technology. By infusing AI intelligence into its products, RPost is changing the way that companies can protect content and transactions.

"Hot Vendor-of-the-Year" for DTM

> This recognition validates RPost commitment to providing organizations with the tools they need to embrace digital transformation, **enhance customer experiences, and ensure the security and privacy of their digital interactions, not only for the 'today' but for organizations' journey** of continuous digital transformation into their future.

-- Jim Lundy, CEO, Aragon Research

"Most Innovative" for DTM

> RPost has a broad product portfolio – which allows them to offer a full set of solutions for enterprises. Their portfolio and focus on overall security for content and for eSignatures made them additionally one of the most innovative in the Aragon Research Globe™ for Digital Transaction Management, 2023 report.

-- Jim Lundy, CEO, Aragon Research

"Innovator-of-the-Year" for DTM

Innovator-of-the-Year

Quite simply, **it means RPost has in it the DNA to continue to evolve its products as markets, needs, and risks change**, anticipating not only what you need today, but having ready what you will need tomorrow.

It means one can with confidence choose RPost products and know that you'll have best-in-class into the future. Your teams will build comfort with the RPost technologies, get more out of them over time, and they will become an extension of how you and they will do more business securely and efficiently**.**
