✓ Restrict access by IP	✓ Times read per recipient	
✓ Watermark	✓ Time spent reading per recipient	
✓ Time to expiration	✓ Limit number of reads per recipient	
	✓ Voting/Vote sharing	
	✓ Notification of reading	

RDocs™ document controls allow senders to track popularity of a document, track speci ic reader activity, or restrict access to certain designated viewers – all with no companion software download or logins for readers.

Track Views: this security level enables the sender to have visibility into popularity of a document that may be transmitted or posted for download and yet retain the ability to expire temporarily or kill the document entirely.

Track Readers: this security level provides the original sender insights into how many times and in what geographic locations the document has been opened and viewed, with insights tagged to each reader. This makes RDocs™ technology a powerful marketing tool, allowing you to hyper-target readers based on how much time they spent reading documents, which pages caught their interest the most, and more.

Limit Readers: this security level provides the original sender all the controls and insights of Track Readers, plus additionally allows the originator to restrict who can read the RPD™ f ile to prevent forwarding. This Level of Security can give peace of mind to the original sender when sharing inancial tip newsletters or research reports, among others, by preventing distribution to unauthorized viewers.
