## Timestamp & Dynamic Watermarking

RDocs™ empowers originators with a historical record of when the documents were created, and also actionable proof to identify those who disclose sensitive information thanks to steganographic, dynamic and in-motion watermarking that is uniquely identifiable to each authorized recipient.

Uniquely applied to RDocs™, this last option adds authorized reader visual identity tags that traverse each viewed page. These added levels of accountability help to ensure the security of sensitive information, while also providing an easy way to track the lifecycle of a document.
