Cybersecurity Meets AI

EDR Re-Imagined: See the Unseen™

See leaks inside endpoints of your third parties.

Cybercriminals seeing your content inside networks of your third-parties (e.g., suppliers) can expose you to a boomerang of hyper-targeted-hyper-contextual lures that can cause you chaos. See leaks inside the endpoints of your third-parties.

Agentic AI: Un-Leak Leaks™

Leaks killed before seen are not reportable breaches.

AI security agents see cybercriminals or unauthorized viewers attempting to access your sensitive docs attached to messages and even in third-party systems, and then pre-emptively lock them out.
